As the School Board of the Catawba County Schools, we believe it to be our responsibility to ensure that every effort is made to conserve energy and natural resources while exercising sound financial management.

The implementation of this policy is the joint responsibility of the board members, administrators, teachers, students and support personnel and its success is based on cooperation at all levels.

Each principal will be accountable for energy management and conservation on his/her campus. Judicious use of the various energy systems of each campus will be the joint responsibility of the principal and head custodian to ensure that an efficient energy posture is maintained on a daily basis.

All Catawba County Schools personnel will be expected to contribute to energy efficiency and conservation in our system. Every person will be expected to be a pro-active energy saver as well as an efficient inherent energy consumer.

Energy management and conservation on his/her campus will be made a part of the principal's annual evaluation.

Administrative procedures for energy management and conservation will be issued by the superintendent that describes detailed guidelines and practices to be followed in fully implementing our energy program.
