

6th Grade

Energy Inventory

Students in the 6th grade will do an Energy Inventory of Snow Creek.

The Energy Inventory will require students to do an overall campus tour and seek input from the administration, custodians and district level coordinators.

During the Energy Inventory Marty Beal, architect and Rick Sain, Construction and Maintenance Director will be at the school to answer questions. Students will bring their collected data back to the classroom to discuss with other students and the teacher.

The inventory is borrowed from Kentucky Green and Healthy Schools.

The Energy Inventory can be downloaded here:
