

Kindergarten and First Grade
Guest Presentation and Building Tour

Presented by Mr. Klassett, Assistant Principal

Kindergartners and First Graders will be introduced to the performance features of Snow Creek by Mr. Klassett, our assistant principal. Through the use of a slide show of different parts of the building, he will describe Snow Creek in terms of saving money by using less energy and less water!

Some of the focus points of the guest presentation will be:

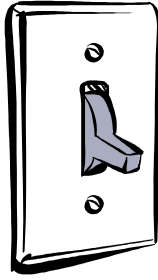

1. white metal roof
2. sediment pond
3. sky lights in the lobby
4. trees outside classrooms
5. drought tolerant shrubs and plants
6. automatic light sensors
7. motion detectors for outside lighting
8. air conditioning and heating system
9. toilets with high and low flow flush
10. waterless urinals
11. energy star appliances

During the building tour students will do a scavenger hunt for the high performance features of Snow Creek.

As the performance features are found the students will check them off and discuss their significance with the group leader.

Students will use the attached scavenger hunt form.

Name _____

Light Switch

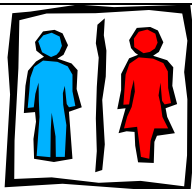

Sediment Pond
